The Preventive health care plans address preventive care services only and do not include services for medical conditions, illnesses or emergencies. Billing services are provided by Acumenex Billing Services. If you have any questions regarding your pet's treatment, please contact our team. For our complete terms and conditions, please read our Preventive Health Care Plans agreement.

# Preventive Health Plan Adult

## Vaccines

Vaccinating your dog is very important to decrease their exposure to many contagious and debilitating diseases. We will recommend a vaccination protocol that is appropriate for your dog's lifestyle.

## Annual Physical Exams

Your dog is aging much more quickly than you and changes can occur quickly. Besides identifying and managing any medical concerns this plan emphasizes the importance of oral care and health.

## Prevention

Preventive care is the foundation for providing your dog a lifetime of good health. Many diseases can be successfully prevented or managed with early screening, including bloodwork, urinalysis and promoting optimal oral health. These are all essential to detecting diseases early before they become serious – and very expensive.
