The Preventive health care plans address preventive care services only and do not include services for medical conditions, illnesses or emergencies. Billing services are provided by Acumenex Billing Services. If you have any questions regarding your pet's treatment, please contact our team. For our complete terms and conditions, please read our Preventive Health Care Plans agreement.

Preventive Health Plan Kitten

Underdeveloped Immune Systems

Kittens are very susceptible to diseases at this stage in their lives. It is important to vaccinate and bring in a minimum of two fecal samples for analysis to provide maximum protection.

Rapid Growth

Kittens grow at an accelerated rate. They need to be seen on a regular basis to make sure that their growth and development is on the right track. This will decrease the chance of developing health concerns down the road.

Prevention

Preventive care is the foundation for providing your kitten a lifetime of good health. Many diseases can be successfully managed with early screening, including bloodwork and urine analysis. Early disease detection is key to preventing serious illness and expensive costs.
